JUNIOR FRONT-END DEVELOPER

Objective:

Front-end development focused on creating visually appealing and functional interfaces, applying transferable skills from journalism and project management. I seek to apply my experience in front-end development to provide an enhanced user experience, driving innovation in building interactive solutions. I have a proven track record in operational efficiency and am prepared to contribute significantly to development teams.

Skills I Can Add:

Analytical ability | Creativity | Attention to detail | Decision making

Interpersonal Skills - Soft Skills:

Time management | Good communication | Self-taught | Collaborative spirit | Critical thinking

Professional Experience

MIP – Manage Implement Projects

Front-End Developer - (February 2024 - Present)

- Development of responsive and intuitive user interfaces using React, TypeScript, and styled-components.
- Participation in planning meetings and requirement discussions focusing on agile methodologies like Scrum and Kanban.
- Implementation of API calls with Axios for data integration between frontend and backend.

Achievements:

- Optimization of components to improve application performance.
- Effective collaboration with the backend team to ensure smooth and efficient integration.

Codigo Certo

Front-End Development Mentor - (July 2024 - Present)

- Guidance and support for beginner developers, helping them understand frontend concepts and coding best practices.

- Planning and execution of workshops and mentoring sessions focused on React, TypeScript, and related tools.
